Why should I create mind maps?

01

Aids with
memory recall

02

Helps to
visually
organise your
notes

03

Makes
connections
between
knowledge

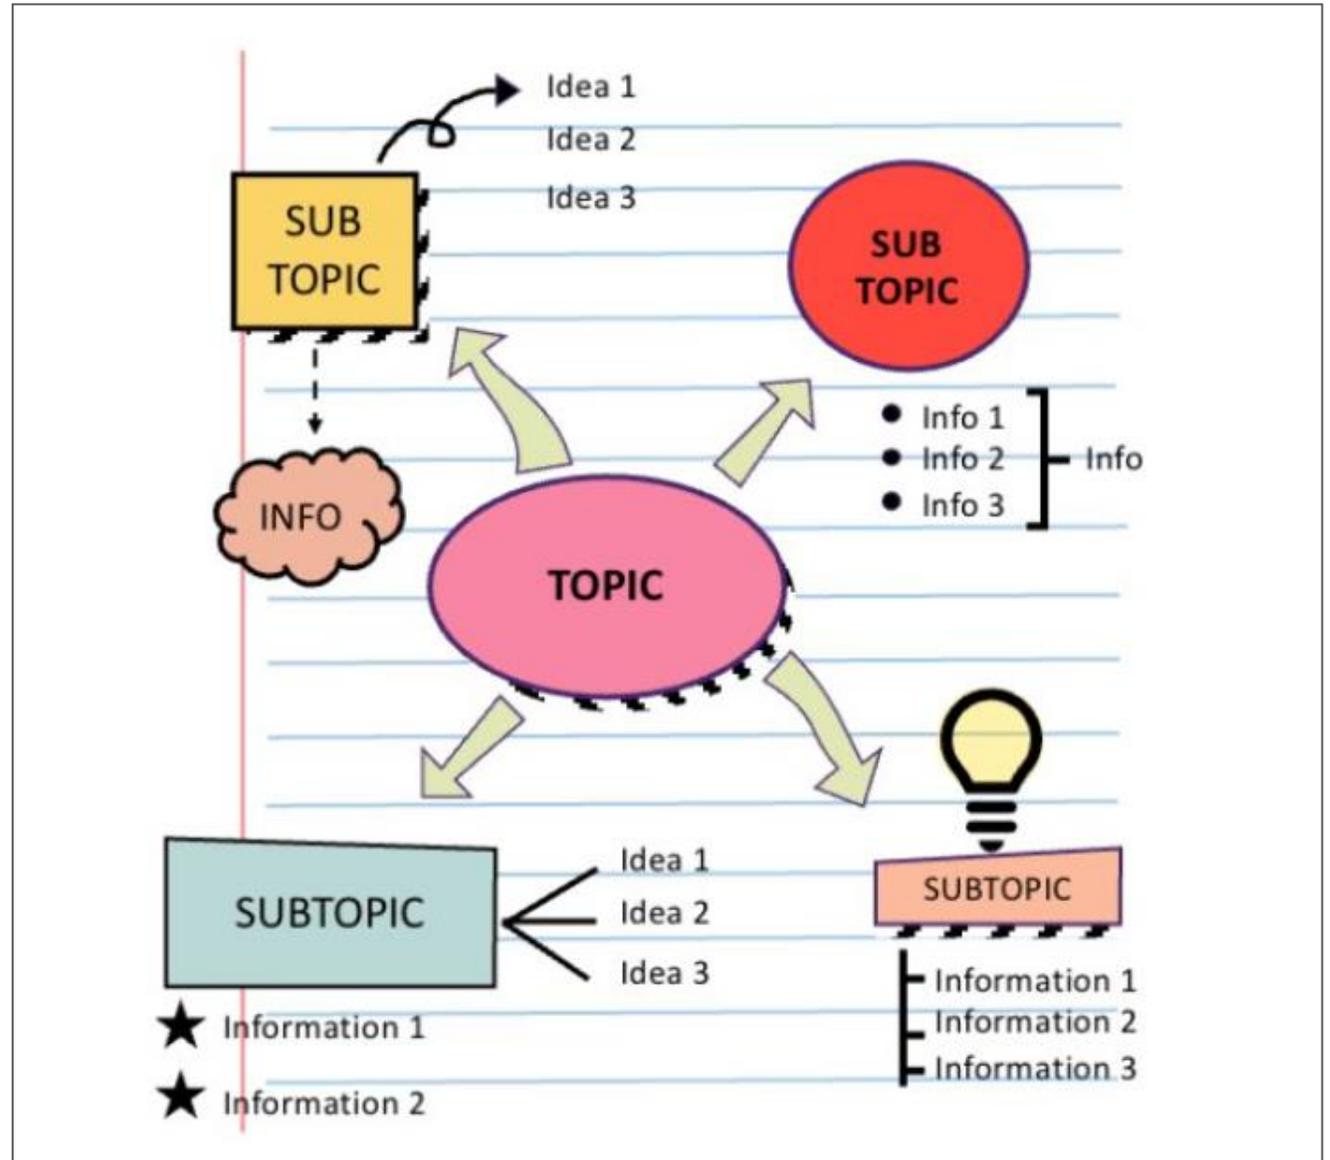

04

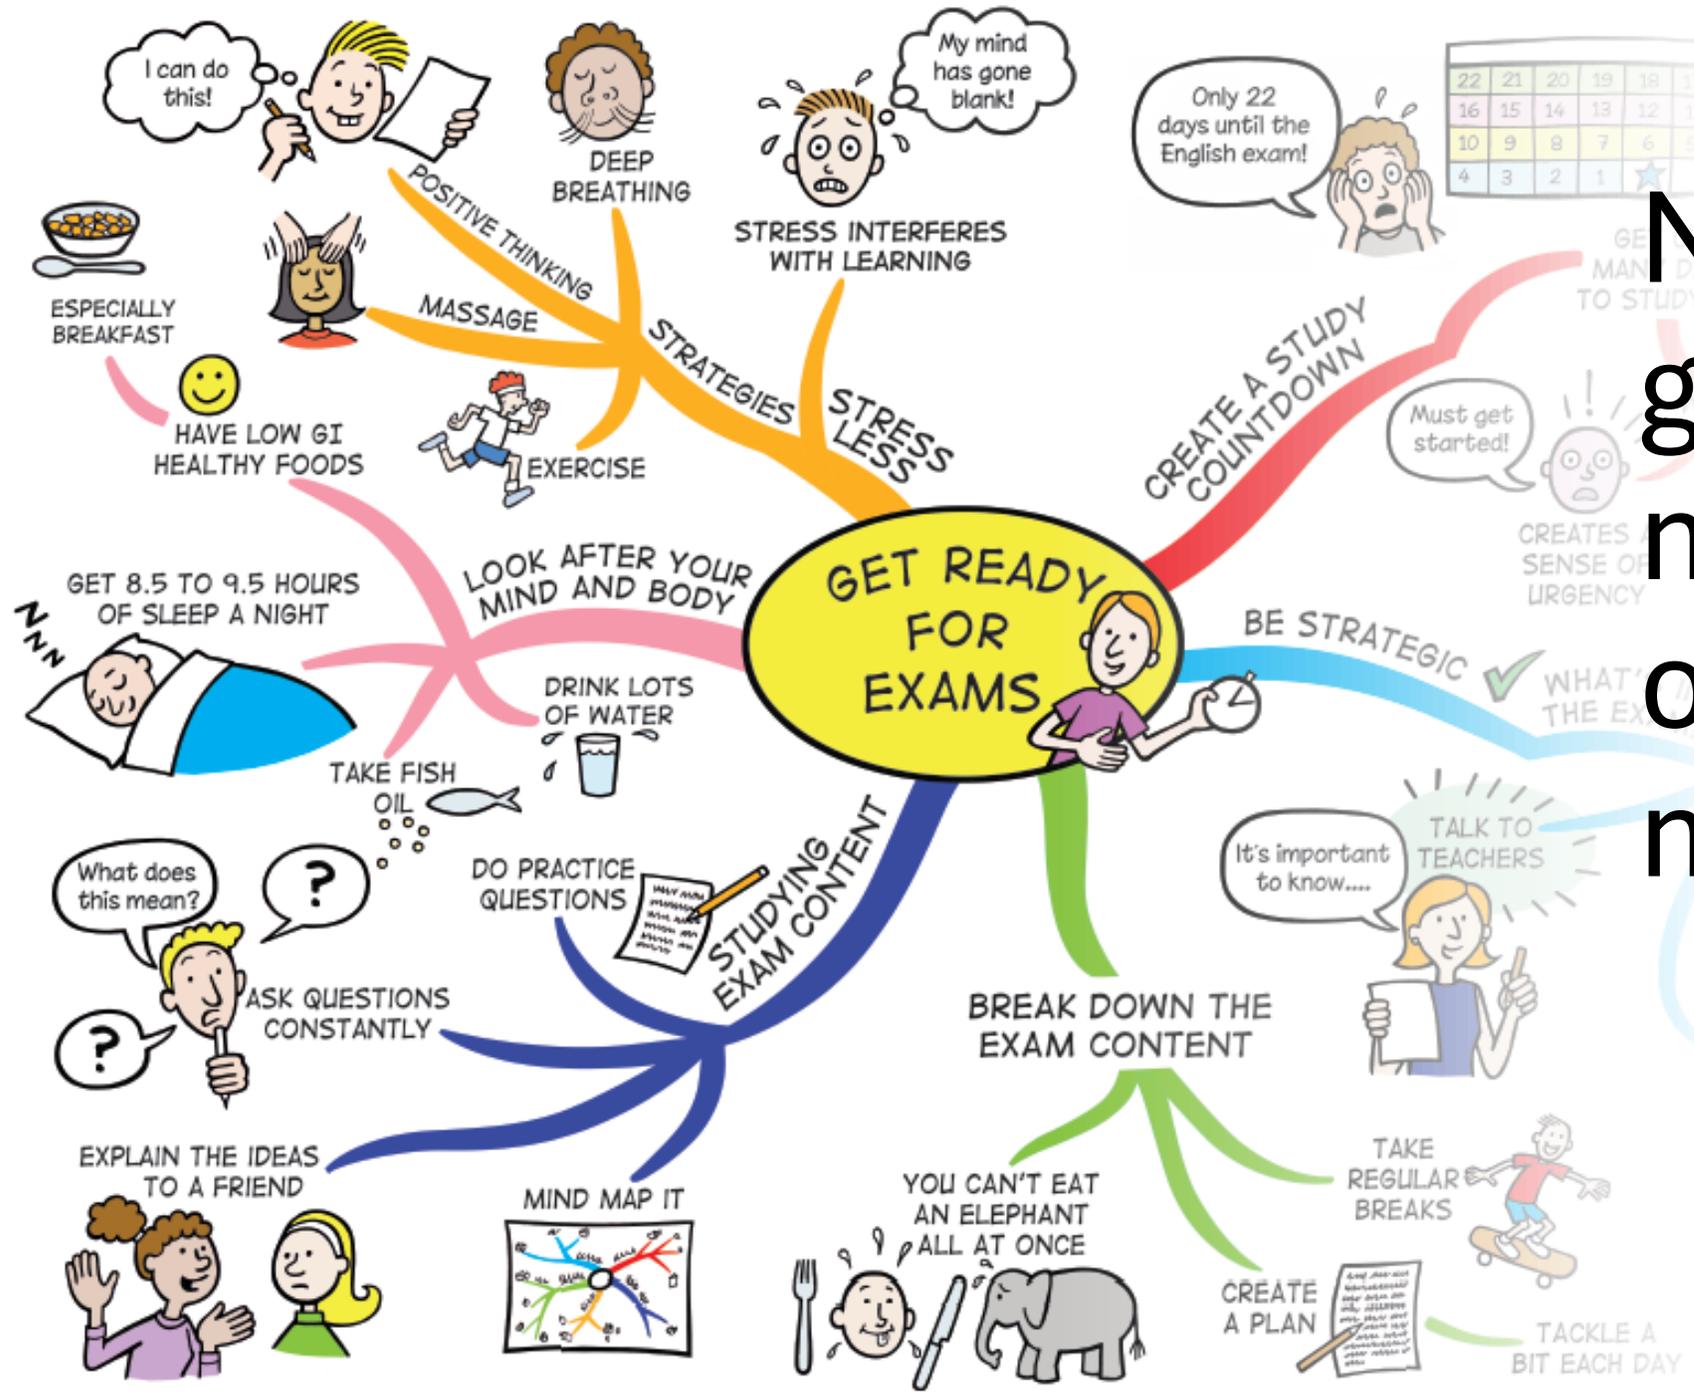

Helps to
organise and
simplify
complex ideas

Mind Maps

1. Write the topic you wish to study in the middle of your page. You can also create sub-headings branching off.
2. Without using your notes, write down everything about the topic. You could also add images and diagrams.
3. Once you have written everything you can remember, go back to your notes and add anything you have forgotten.

TIP: Use a different colour of pen for Steps 2 and 3 so you can see what pieces of information you may need to revise further.

Now have a go at making your own mind map
